

```
1 #include <stdio.h>
2
3 struct Student {
4     int roll;
5     char name[50];
6     float marks;
7 };
8
9 // Function to display student details
10 void display(struct Student s) {
11     printf("\n--- Student Details ---\n");
12     printf("Roll Number: %d\n", s.roll);
13     printf("Name: %s\n", s.name);
14     printf("Marks: %.2f\n", s.marks);
15 }
16
17 int main() {
18     struct Student s1;
19 }
```

```
Enter Roll Number: 123
Enter Name: jeni
Enter Marks: 95.5
--- Student Details ---
Roll Number: 123
Name: jeni
Marks: 95.50
==== Code Execution Successful ===
