```c
1   #include <stdio.h>
2
3 ▾ struct Employee {
4       int id;
5       char name[50];
6       float salary;
7   };
8
9 ▾ int main() {
10      struct Employee e;
11
12      printf("Enter Employee ID: ");
13      scanf("%d", &e.id);
14
15      printf("Enter Employee Name: ");
16      scanf("%s", e.name);
17
18      printf("Enter Salary: ");
19      scanf("%f", &e.salary);
```

```
Enter Employee ID: 1234
Enter Employee Name: jeni
Enter Salary: 100000

--- Employee Details ---
Employee ID: 1234
Name: jeni
Salary: 100000.00

=== Code Execution Successful ===
