```c
#include <stdio.h>

struct Student {
    int roll;
    char name[50];
    float marks;
};

int main() {
    struct Student s;

    printf("Enter Roll Number: ");
    scanf("%d", &s.roll);

    printf("Enter Name: ");
    scanf("%s", s.name);

    printf("Enter Marks: ");
    scanf("%f", &s.marks);
```

```
Enter Roll Number: 123
Enter Name: jeni
Enter Marks: 90.0

--- Student Details ---
Roll Number: 123
Name: jeni
Marks: 90.00

=== Code Execution Successful ===
```
